BASSI'S LAWN GRASS SEEDS

For Fall Planting

The best results in making lawns are attained by sowing Lawn Grass Seed from Sept. 15 to Oct. 15. By this method a good growth is produced during the cool Fall months strong enough to withstand the rigors of Winter and the continued growth of the following Spring results in a fully established lawn in early Summer which resists the Summer heat better than the lawn planted in the Spring.

BASSI'S BEST is compounded after our own formula, and scientifically blended, so as to produce in six weeks a thick velvety turf, which remains green throughout the season. We consider this the highest grade lawn seed obtainable. It contains a large percentage of creeping bent grass and some white clover, and is the ideal lawn seed for Westchester conditions. One pound is sufficient for 250 sq. ft. or a plot 10 x 25 ft.

1 lb. 70c; 2 lbs. \$1.35; 5 lbs. \$3.25;
10 lbs. \$6.25; 25 lbs. \$15.00;
100 lbs. \$57.50.

BASSI'S SPECIAL MIXTURE. For parks, large areas and new lawns. We have compounded this special mixture, which will make a quick and even growth, free from weeds. With exception of above it is equal to any sold in Westchester.

1 lb. 50c; 2 lbs. 95c; 5 lbs. \$2.30; 10 lbs. \$4.25; 25 lbs. \$10.00; 100 lbs. \$38.50.

BASSI'S SHADY LAWN MIXTURE. An extra fine mixture, composed of grasses, which live naturally in the woods. It will produce a nice turf in very shady places.

1 lb. 70c; 2 lbs. \$1.35; 5 lbs. \$3.25; 10 lbs. \$6.25; 25 lbs. \$15.00; 100 lbs. \$57.50.

Bassi's Putting Green Mixture. A special bent formula for use on high grade putting greens. It is recommended for well prepared rich soils.

1 lb. 85c; 5 lbs. \$4.00; 10 lbs. \$7.50;
25 lbs. \$18.00; 100 lbs. \$67.50.

Bassi's Terrace Sod Mixture. A mixture of grasses with strong spreading roots, which will hold terraces and hillsides from washing with heavy rains. It will produce a green turf. Thrives on hot and shallow soils.

1 lb. 60c; 2 lbs. \$1.15; 5 lbs. \$2.80;
10 lbs. \$5.50; 25 lbs. \$13.50; 100 lbs. \$52.50.

Bassi's Tennis Court Grass Seed. To produce the elastic, tough playing surface required of a tennis court, we recommend this mixture at the rate of 1 lb. to each 100 square feet. Keep closely mowed.

1 lb. 75c; 10 lbs. \$7.00; 25 lbs. \$17.00.

Bassi's Seashore Lawn Seed. This mixture is selected for its deep rooting qualities and its resistance to salt spray and high winds.

1 lb. 70c; 5 lbs. \$3.25; 10 lbs. \$6.25;
25 lbs. \$15.00; 100 lbs. \$57.50.

VIGORO a specially prepared food for Lawns. Apply 5 lbs. to every 1 lb. Lawn Grass Seed.

GIANT DARWIN TULIPS

DARWIN TULIPS SURPASS ALL OTHER MAY FLOWERS IN BEAUTY

If you own a garden, we confidently recommend these wonderful tulips for their rich and varied colors, and their permanency in the garden. The varieties we offer have been specially selected to allow ample choice of color.

Darwin Tulips bloom in May and in conjunction with the Breeder and Cottage varieties have a three week season in which they hold supremacy both in color and stateliness—all other flowers fade into oblivion for effect, though they may be agreeable but less conspicuous companions.

CULTURE: Plant the bulbs 5 inches deep and 5 inches apart each way. A well drained soil is essential to success and we recommend placing a handful of sand beneath each bulb when planting. Even in light sandy soils this precaution will eliminate all danger of rotting. Same instructions apply to all outdoor tulips excepting where hereinafter noted.

To increase the size of the flowers and intensify their color, we recommend the use of a small quantity of "FLORANID," description and full particulars of which will be found on page 32.

COTTAGE TULIPS

Old English or May Flowering.

This race of delicately perfumed tulips, flowers at the same time as the Darwins. They not only blend delightfully with the latter, but they have the added advantage of being entirely suitable for use amongst perennials—either in beds or borders.

	Doz.	100
BOUTON D'OR: A ball shaped flower of rich golden yellow. Splendid for cutting. 20 in.50	3.75

MISCELLANEOUS LATE FLOWERING TULIPS

	Doz.	100
BIZARRE TULIPS IN MIXTURE: A very old, tall growing race that retains its popularity due to the quaint color combinations that characterize it. These tulips are striped, slashed and feathered in rich browns, maroons or blacks on a yellow ground; odd flowers that always demand attention.	\$0.75	\$5.75
PARROT TULIPS IN MIXTURE: Large flowers in the gayest combinations with oddly serrated, notched and fringed petals. Before expanding, the shape of the flower has a great resemblance to the neck of a parrot—hence the name. Three year old flowering bulbs.	.60	4.50
BYBLOEMENS IN MIXTURE: Another very showy race with distinctive stripes and feathers in lighter colors. Very interesting and uncommon.	.75	5.50
CLUSIANA: The "little lady" tulip. An exquisite little gem to tuck away in some sheltered nook in the rock garden. The outer petals are cherry red, while the inner ones are creamy white with violet base. Plant 3 in. deep in light soil, where if left undisturbed, it will naturalize and grow for years. Ultimate height 8 in.	.90	7.00

CROCUS

Petite little floral gems that thrust their multi-hued flowers through the retreating snows. Hardy and easily grown, they should be planted in bold broad masses for best effects.

35c per dozen, \$2.50 per 100, \$23.00 per 1000.

BEDDING HYACINTHS

EXHIBITION HYACINTHS

Selected Top Bulbs

CULTURAL NOTES: Hyacinths are best planted 4 inches deep to the top of the bulb, and from 6 to 8 inches apart. After the first hard frost they should be covered with litter to protect the bulbs from alternate freezing and thawing. While hyacinths may be planted up to December, we earnestly recommend early planting.

After very careful selection we offer the following list with utmost confidence. They represent the very best of their kind and are recommended for exhibition purposes. The bulbs are well ripened, 6 year old stock, vigorous and healthy and with reasonable care will produce immense spikes of bloom.

GERTRUDE: Glowing deep rose pink, flowers compactly set on a good strong stem.

GRAND MAITRE: Luminous lavender blue.

KING OF THE BLUES: Rich dark blue. Quite the best of its color.

LADY DERBY: Hyacinth lovers claim this as the finest of all. Color a soft rose pink.

LA VICTOIRE: Intense bright carmine.

L'INNOCENCE: Strong spike of wax-like bells of purest white.

YELLOW HAMMER: Soft creamy yellow, delightfully fragrant.

Price of above varieties—35c each, \$3.75 per dozen, \$30.00 per 100.

Bedding Hyacinths

SNOWDROPS IN GRASS

EARLY FORCING BULBS

The following bulbs represent the best varieties for forcing or indoor culture. We recommend the use of our Bulb Fibre for growing bulbs indoors but success may also be had by using a rich sandy loam with a liberal quantity of bone-meal incorporated in it. Plant the bulbs so that the tops are just below the surface and at least 1 inch apart. Water thoroughly and place in a cool dark cellar for 6 to 8 weeks. At the end of this period the root system will have developed and they may be brought into the conservatory or window garden.

Hardy Perennials

including Alpines and Rock Plants

ONE of the most charming and delightful features of the well planned garden is the use of a liberal quantity of perennial plants. Their varied assortment, brilliant coloring, ease of culture and long succession of bloom make them invaluable for either cut flower purposes or for permanent decorative features from early Spring until late Fall. Perennials may be planted in either Spring or Fall. However, Fall planting is preferable if the plants are expected to bloom the following year. September or October are the best months. Iris, Peonies and Phlox must be planted in the Fall if bloom is expected of them during the following Summer.

Plants marked thus (*) are suitable for Rock Gardens.

HARDY ROSES

The German or bearded Iris is unquestionably one of the easiest and most desirable of all border plants. Not particular as to soil, it gives a feast of blooms in May that few other spring flowers can equal. In the following description "S" refers to the standards or upper petals and "F" has reference to the falls or lower petals. The following varieties have been carefully selected and represent the best of the race. Fine strong roots from which you can get blooms next summer.

IRIS SIBIRICA

Snow Queen. An exquisite new variety in the Siberian Irises. Flowers are a pure white in color, large and well formed and produced in great abundance. Foliage is light and graceful. A real gem for planting in the border or at the side of the pool. Each 35c; per dozen \$3.50.

JAPANESE IRIS

We have a superb collection of these iris which are taller and larger than the German Iris. Blooming as they do, later than the German type they are valuable in prolonging the Iris season. Their formation is quite distinct from other types; the flowers being salver shaped and without the great depth of the falls as in the German Iris. The coloring is exquisite, ranging from pure white, through blue, purples, lavenders, mauves to reds. We have eliminated those not up to our requirements. Price, 50c each; \$5.00 per dozen.

HARDY PHLOX

Phlox are among the most showy of hardy plants. While a rich loam gives best results, they thrive in most soils and deserve a prominent position in every garden where by growing a representative collection one may enjoy a long succession of bloom. They are seen to best advantage in plantings of five or more of a kind. Blooming from late June until late fall, they are unsurpassed for cut flowers. We list the choicest varieties only in large strong clumps.

Commander-in-Chief. Gorgeous, non-fading crimson red.

Eclairer. Carmine-violet-red.

Jeanne d'Arc. Tall, pure white, late flowering.

Jules Sandeau. Large trusses of pure pink.

La Vague. Pure mauve pink with red eye.

Miss Lingard. A very fine early blooming white phlox with just a suggestion of lilac in the center of each floret. Fine trusses, blooming for a long period.

Peachblow. Delicate pink with rose center. Dwarf in size.

Professor Virchow. Brilliant carmine, overlaid with orange carmine.

R. P. Struthers. Brilliant rosy-red, crimson center.

Rosenburg. Carmine-white with dark red eye.

Rynstroom. Gorgeous deep pink.

Thor. A vivid shade of deep salmon pink, suffused scarlet.

W. C. Egan. Immense trusses of delicate lilac.

Prices on any of the above, 30c each; \$3.00 dozen.
Collection, 3 each of the 13 varieties above, \$9.00.

DWARF SPRING FLOWERING PHLOX

PHLOX, RYNSTROOM

PEONY—
BARONESS SCHROEDER

HERBACEOUS PEONIES

Peonies are among the best loved of the Hardy Perennials. Easily grown, beautiful alike in flower and foliage, improving from year to year, they rank high in public esteem and, we venture, always will. A deep rich soil, well supplied with rotted manure and bone meal, an abundance of water during the flowering season seems to be the sum of their desires. When planting, however, care should be taken that the eyes be not covered deeper than two inches. The prices quoted are for divided clumps of from three to five eyes but we can supply larger clumps for specimen plants. Each

HIGH GRADE FERTILIZERS

ADCO ARTIFICIAL MANURE

You can make your own manure from your garden refuse such as grass clippings, weeds, leaves, vegetables, etc. Not injurious to health or animals. Odorless and free from weeds. Mix ADCO with layers of any of the above and keep the mixture moist by watering and you will see it decompose within three months and make manure. Adco 25 lb. bag enough for 12 wheelbarrows of waste or $\frac{1}{2}$ ton manure \$2.00. 150 lb. bag enough to make 3 tons manure. \$11.50.

BULB FIBRE (Prepared)—See page 15

FINE GROUND BONE MEAL. Best for use in top dressing lawns, for rosebeds, trees and shrubbery, and all flowering bulbs. Absolutely no danger of burning, therefore, can be used at all times. For lawns, it is indispensable, promoting a fine growth that no other fertilizer can duplicate. For all hard wooded plants too such as roses, trees and shrubs it is invaluable if worked in at the rate of 2 to 4 lbs. per plant, depending on the size of the plants. For lawns spread at the rate of 10 lb. to 200 sq. feet. High analysis. 2 lbs. 30c; 5 lbs. 60c; 10 lbs. \$1.00; 25 lbs. \$1.75; 50 lbs. \$2.75; 100 lbs. \$5.00; $\frac{1}{2}$ ton \$40.00; 1 ton \$75.00.

SHEEP MANURE. Pure pulverized, a nutritious fertilizer, immediate and lasting in effect for flower-beds or for making new lawns, and indispensable for helping to loosen up hard clay soils and promoting a healthy and vigorous plant growth. Free from weeds. 5 lbs. 60c; 10 lbs. \$1.00; 25 lbs. \$1.75; 50 lbs. \$2.50; 100 lbs. \$4.50; $\frac{1}{2}$ ton \$35.00; 1 ton \$65.00.

COW MANURE. Shredded for top dressing lawns or fertilizing flowerbeds. Per 100 lbs. \$4.50.

HUMUS. Decayed vegetation, the natural product for enriching lawns and flowerbeds, and stimulating potted plants.

A valuable and ideal soil enricher for all garden purposes. The best for loosening hard clay soils and is a fine absorbent for moisture during hot dry seasons, also adding valuable plant food to the soil. For potting it is ideal, mixing with soil at the rate of $\frac{1}{2}$ humus to $\frac{1}{2}$ soil.

5 lbs. 30c; 10 lbs. 60c; 25 lbs. \$1.00; 50 lbs. \$1.50; 100 lbs. \$2.50; $\frac{1}{2}$ ton \$20.00; 1 ton \$30.00.
